NIH Staff Videocast Viewing Instructions

Event: Preparing for NIH Electronic Grant Application
Date: Tuesday, December 05, 2006
Morning Plenary Session: 9:00 AM – Noon EST
(Repeat) Plenary Session: 1:00 PM – 4:00PM EST

Click This Link to View the Videocast: http://videocast.nih.gov/

Software Requirements: RealPlayer software is required.
NIH staff download Windows or Mac RealPlayer.

Please Test Your Computer in Advance at: http://videocast.nih.gov/browsertest/.
RealPlayer uses RTSP at port 554 (or PNM over port 7070) for unicasting. These have
to be allowed through your firewall to connect to our events. The RealPlayer video size
is 320x240. This format works best to stream content over the Internet.

Auditorium Style Live: The best way to show an NIH videocast to a group in an
"auditorium style" would be to lower the computer's screen resolution to its lowest
640x480 or 800x600. To avoid degraded video, do not play in full screen. Double screen
works best. The videos will be archived in the Past Events section and the files will be
available for download. **The archive may provide a better viewing experience in an
auditorium because the entire file will be downloaded first.

Event Registration & Details: Registration is *not* required to view the videocast – but *is*
required if you will be attending live at Natcher. Event details and registration are
available at: http://era.nih.gov/training/esub_120506/

Cost: The event is free of charge.

Comments/Questions During the Presentation: Remote viewers can send comments
during the live VideoCast by using the Live Event Feedback Form.

Technical Support: For technical support, please contact the NIH Helpdesk at (301)
496-4357, or toll free at (866) 319-4357 or via email at: helpdesk@nih.gov

Event Questions: For questions related to the event registration or content, please
email the NIH Electronic Submission Team
